**Dr. Martin Luther King, Jr., and Service in
America**

Run Time: 16 Min. GR: 6-12; Subject: Black History Month

Description: Dr. Martin Luther King, Jr., saw himself as a servant of humanity, and he wanted his life to be remembered as a life of service to others. In this episode, we look at Dr. King's legacy of service. We'll explore how his use of nonviolence was not just a political tool, but a way to demonstrate service to others. Get ready to learn about some of the other activists who drew their inspiration from Dr. King. And we'll even learn about ways that you can serve your community! Join us as we honor the memory of this great American by talking about service!

Great American Authors: Part 1: 1650-1845

Run Time: 28 Min. GR: 7-12; Subject: English/Language Arts

Description: The awe-inspiring saga of America's greatest authors comes alive in Great American Authors since 1650. As the American colonies moved toward becoming an independent nation, a unique and distinctive voice poured forth from the pens of its authors. Once the nation was founded, America's first literary giants - Washington Irving, James Fenimore Cooper, Ralph Waldo Emerson and Edgar Allan Poe - told stories and wrote poems that could have only come from the heart and soul of this fledgling country.

Chapters:

- 1650: Anne Bradstreet, America's First Poet
- 1702: Cotton Mather Publishes The Ecclesiastical History of New England
- 1773: Phillis Wheatley Becomes America's First Black Woman Poet
- 1819: Washington Irving Publishes Rip Van Winkle
- 1826: James Fenimore Cooper Publishes Last of the Mohicans
- 1836: Ralph Waldo Emerson Initiates American Transcendentalism with Nature
- 1845: Edgar Allen Poe Publishes The Raven

Great American Authors: Part 2: 1846-1855

Run Time: 30 Min. GR: 7-12; Subject: English/Language Arts

Description: Between the War of 1812 and the Mexican American War that ended in 1848, America experienced an exuberant economic period of growth. And, it was during this time that American authors produced the nation's first great wave of classic literature. In this program, such literary giants as Herman Melville, Walt Whitman, Emily Dickinson and Henry Wadsworth Longfellow make their mark on the American psyche.

Chapters:

- 1849: Henry David Thoreau Originates America's Proud History of Civil Disobedience
- 1850: Nathaniel Hawthorne Writes The Scarlet Letter
- 1851: Herman Melville's Moby Dick is Published
- 1852: Emily Dickinson Publishes First Poem
- 1852: Harriet Beecher Stowe Writes Uncle Tom's Cabin
- 1855: Frederick Douglass Publishes My Bondage and My Freedom
- 1855: Walt Whitman Publishes Leaves of Grass
- 1855: Henry Wadsworth Longfellow Writes The Song of Hiawatha

Cosmos: Solar System: Part 1

Run Time: 30 Min. GR: 10-12; Subject: Math, Science, & Technology
Description: The solar system is alive. At its heart is our Sun, offering the very molecules of its body to create the energy fueling the system.

The planets are the concentrated remnants of an enormous cloud of dust and gas that had transformed into a disk, condensed at its center until finally igniting into a star. The new sun burned away its mantle of gas, just as we can see it happen today in nearby supernovae. In the early days of the sun's life, far more comets rained into the inner solar system, carrying some organic matter and water. Earth may be the only life-sustaining planet in the solar system, but there is a possibility that some moons of Jupiter and Saturn may be life-friendly as well.

The Future of Water: Part 3: The Water Age

Run Time: 52 Min. GR: 10-12; Subject: Math, Science, & Technology

Description: The uncertainty of climate change and the increasing need for water is bringing a renaissance of large new water transfer methods. Throughout history, transferring water has been vital to building civilizations. Travel to the Sahara desert and learn how Egypt's leaders envision creating huge towns and large areas of cultivated land by pumping in water from an artificial Nile lake to irrigate the desert. Examine Russia's plan to build canals for water transport to several countries in central Asia, which lack water. Travel to South America and see a complex hydrological system that guarantees Brazil and Argentina a sure source of water for the future. Scientists are studying ways to locate underground water deposits and transport this water to populated areas that lack water. Travel to Iceland and learn how they are using buses that are fueled by water.

Diabetes: Teens Fight Back

Run Time: 10 Min. GR: 9-12; Subject: Health, Guidance, & Safety

Description: An obesity epidemic has swept America—leading to an alarming rise in diabetes cases. This video looks at the disturbing trend and illustrates how diabetic teenagers can lead rewarding lives instead of becoming passive victims. Interviewing two young men and following them through their daily routines, the program reveals the benefits of staying positive and active. Will—a high school student with Type 1 diabetes—maintains a rigorous injection and glucose-monitoring schedule while excelling at soccer and remaining focused on school and his social life. Justin, age 12 with Type 2 diabetes, talks about his struggle with weight control and his triumphant loss of 18 pounds.

Steroids: Big Muscles, Bigger Problems

Run Time: 25 Min. GR: 7-12; Subject: Health, Guidance, & Safety

Description: A lot of time, energy, and media coverage has been spent trying to figure out which high-profile athletes have or have not used steroids, and whether or not the users still belong in the record books. Lost in the shuffle is the story of the damage that steroids can cause, not just to celebrity sports stars but to everyday young people—including teenage girls, the fastest-growing demographic group of steroid users in America. Hosted by ESPN.com reporter Tom Murray, this video brings hard facts, straight talk, and inconvenient truths to the problem of steroid use among male and female teenagers. It illustrates the biochemical basics of anabolic steroids and their synthetic relationship to testosterone; their general impact on the human anatomy and how they can be especially devastating in young people whose bodies aren't fully developed; and the specific medical risks of steroid use, both in the short-term and over an extended period. The psychological risks, most notably suicidal depression, are also presented, in addition to the little-known fact that many over-the-counter diet supplements are spiked with anabolic steroids.

Managing Your Money

Run Time: 23 Min. GR: 9-12; Subject: Life Skills/Financial Literacy

Description: Money management is the key to independent living. This video puts money under a microscope as it looks at budgeting it, spending it wisely, and protecting it (and, by extension, that all-important credit rating). Specifics include opening a checking account, writing checks, making deposits, and balancing a checkbook; using ATM and debit cards; applying for a loan; and deciding whether to opt for a credit card—and if so, how to use it responsibly. A smart investment!

Paying Your Way Through College

Run Time: 29 Min. GR: 9-12; Subject: Life Skills/Financial Literacy

Description: To get to college, good grades and high hopes will take a person only so far. Sooner or later the subject of tuition will come up, and no amount of wishing will make it go away. Fortunately, a little creativity and a lot of determination can pay off—literally. This video will help viewers understand four key financial aid sources: scholarships, grants, work-study, and student loans. The program also offers tips on earning extra cash and includes the “High School Road Map to Financial Aid,” an incredibly helpful schedule that spells out what to do and when to do it, starting with junior year. The key message? Don’t assume a college education is unaffordable. Inspiring!

Accept or Decline? The Applicant Perspective

Run Time: 23 Min. GR: 9-12; Subject: Life Skills/Financial Literacy

Description: This ABC News program considers the higher education endgame where the applicants, once so keen to pitch themselves to top colleges and universities, are now wooed by those who accepted them as the schools seek to close the deal. Several Georgetown University staff members, one candidate who is Georgetown-bound, and two who choose to turn the university down share their perspectives on a variety of key topics: affirmative action, financial aid, and campus culture, to name only three.

**Admit, Defer, or Reject? The Admissions
Perspective**

Run Time: 23 Min. GR: 9-12; Subject: Life Skills/Financial Literacy
Description: After the grades, test scores, essays, and other credentials of students seeking early admission reach the colleges and universities of their choice, the waiting game begins. In this ABC News program, correspondent Michel Martin goes inside Georgetown University's admissions process to take an in-depth look at how that august institution makes its rulings on the many hopefuls who apply—ten for each available slot. Representative committee participants, including a member of the admissions staff, a dean, a faculty member, and an undergrad, give their views, as do some high school students hoping to make the cut.
